

ComeTacts

YMCA Experience Path

## Welcome to our Experience Path “ComeTacts”!

You can experience the exhibition here, but you can also use it for your own YMCA!

### Let's start with drums!

**Drums** attune us to foreign **cultures**, to African and South American cultures.

Drumming, singing, dancing: they all express the zest for life. South Americans are said to have rhythm in their blood! In any case, even reserved Western Europeans are carried away by their music.

In some countries, the **drum** is the only instrument in church services, besides hands.

Drums invite to the **service** – not in every church there are bells.

In Africa and South America, there is rhythm in the working beat of rural life, i.e. when the grain is ground. It is unthinkable to celebrate and dance without the rhythm of drums – which is the case also in many YMCAs.

The exhibition

has been partly funded by Evangelischer Entwicklungsdienst (EED; department for development within the protestant churches) in Bonn, Germany.

Inquiries and bookings of the exhibition:
